

Construction & Turnaround Services — A Willbros Company

CONSTRUCTION & TURNAROUND SERVICES PROVIDES THE EXPERIENCED CRAFTSMAN AND QUALITY THAT EVERY PROJECT MUST HAVE TO BE SUCCESSFUL.

Today's refinery and petrochemical business also requires that a construction team provides commitment and understanding of our client needs in order to translate that into the implementation of the project objectives. Our supervision has gained name recognition throughout the industry in delivering projects on time and within budget.

Our Services

Construction & Turnaround Services combines the best in field construction and fabrication to respond to your most

demanding projects. We approach all projects from the standpoint of safety first. By planning for safety at the beginning, the results bear themselves out by safe completion of the project. We provide the following cost-effective solutions to your construction and turnaround projects:

- FCCU Turnarounds
- ASME Code Work
- Heater Erection and Revamps
- Process Unit Turnarounds
- Boilers and Furnaces
- Hydrogen Plant Construction
- Emergency Outages

We bring a long history of partnerships with the finest clients in the business. We continually seek to develop long-term client relationships that will ensure that the success of our clients and our own success go hand-in-hand.

Quality Performance

Quality is built into all of our work. Starting with expert craftsmen, we strive to maximize quality and minimize defects in every task we perform. In selecting Construction & Turnaround Services, you bring the finest collection of experienced construction personnel to your team. Our people are results-oriented and maintain a commitment to quality that

“TODAY’S REFINERY AND PETROCHEMICAL BUSINESS ALSO REQUIRES THAT A CONSTRUCTION TEAM PROVIDES COMMITMENT AND UNDERSTANDING OF OUR CLIENT NEEDS....”

(Quality Performance, continued)

exceeds anything available anywhere. The highlights of our quality program include:

- Partnering with you regarding our commitment to meet or exceed the requirements of project quality
- Providing high quality adherence to training and detailed welding procedures
- Monitoring, enforcement and ongoing evaluation of project quality
- Providing a complete Q.C. documentation package on each project

Proven Results

Our goal on all projects is to complete them in a safe and environmentally sound manner. In addition, our projects are completed on schedule and within budget. This exemplifies the experience, expertise and dedication that our management team provides for our clients.
