

OUR EXPERIENCE

InServ Field Services personnel are experienced in the refinery and petrochemical business. This allows us to provide commitment not only to understanding our critical client needs, but imparting that knowledge into the overall success of the projects we perform. This experience has established our group as the best in the industry.

We're proud of the long-term commitment our people show to our company – and the customers we serve. With our Field Services team, you are selecting a qualified group to complement your operations and contribute to your facilities' goals.

OUR SERVICES

InServ Field Services can quickly respond to cover the most extensive and demanding projects anywhere in the world. From Jamnagar, India to Houston, TX, our success is measured by our clients in the safe completion of work, increased quality and productivity and in providing cost-effective solutions to your greatest maintenance challenges.

- Specialty Alloy Welding
- New Heater Erection
- Process Heater Revamps
- FCCU Mechanical
- FCC/Coker/Critical Path Projects
- Refractory Projects
- Process Piping & Unit Turnarounds
- ASME Code Work
- Emergency Outages

Our commitment is to partner with you for success. We develop long-term client relationships built on trust and sealed with quality service.

QUALITY PERFORMANCE

InServ Field Services builds quality into every project. Quality can greatly affect the overall project and we feel that this element provides us with a great advantage over other service providers you may consider. The highlights of our quality program include:

- Our commitment to meet or exceed the requirements of project quality
- Providing quality training and detailed procedures
- Monitoring, enforcement and ongoing evaluation of project quality
- Maintenance of 442 weld procedures covering P-1 through P-61 materials and many unclassified alloys and cast materials
- Tracking of welder continuity and qualifications
- Providing a complete Q.C. documentation package on each project
- We have the lowest weld repair rate in the industry

These factors combine to provide for high productivity along with on-time, and on-budget performance.

PROVEN RESULTS

Our projects are completed safely, on schedule, and within budget. This exemplifies the experience, expertise and dedication that the Field Services Management Team provides for our clients. With Field Services planning, mechanical, and welding capabilities, we offer our clients a safe, well-coordinated and efficient project every time.
